DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 1-32 are allowable over the prior art of record because none of the prior art whether taken singularly or in combination to teach the claimed combination as recited. Particularly, required in combination of system and method claimed: an imbalance estimator that determines at least one imbalance estimated based on selected digital samples and an IQ corrector that corrects said I and Q values using said at least one imbalance estimate (claim 1); an imbalance estimator that uses selected portions of said characteristic signal to determine the at least one imbalance metric and an I/Q corrector that corrects said I and Q signals using at least one balance metric (claim 9); estimating at least one imbalance metric using selected digital signals and calibrating the I and Q signals using the at least one imbalance metric (claim 23).

The closet prior art of record (reference 5721754) discloses base band signal (figure 4) includes in-phase (I) and quadrature (Q) components, that were FSK modulated with vary frequency signals; and having signal detector (figure 2, 209) coupled to sampler (202) to detect digital sampled data, and selector (211) for selecting digital sample corresponding to predetermined range of I and Q (at sampling rate 20,000 times per second with frequency represent at +/- 2400Hz and +/- 800Hz). The prior art simply indicate the estimator (217) in cooperation to provide the quality signal (column 3-4). However, the prior art do not discloses the claimed combination as recited in the current application to correct I and Q values using at least one imbalance

estimate from imbalance estimator. Other prior arts discloses generally frequency and phase estimation for MPSK signals (refs 6421,339 and 6,778,613) in different technique, and do not discloses the claimed combination as mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
